Company Description:

Dr. Diesel Technologies (DDTS) is a dynamic and innovative company providing leading edge technology for:

- Diesel diagnostic solutions and test equipment
- Field Service Rugged Computing Solutions
- Engineering Services
- Fleet Tele-Matics Solutions
- On-site Liaison Officer (LNO) / Field Service Representative (FSR)
- Combat Watercraft Diagnostic Solutions
- Content Management Systems (CMS)
- Systems Integration
- Software Development

The Dr. Diesel Technologies Knowledge base has provided performance based diagnostic solutions and test equipment since 2003 to many U.S. Defense contractors, the U.S. Navy, U.S. Marine Corps and U.S. Army. These Joint-Service diagnostic solutions were in direct support of contractors, Sailors, Soldiers and U.S. Marines in the Global War On Terrorism (GWOT).

The Project Manager will lead the management of the Dr. Diesel Technologies vehicle diagnostic test equipment product for U.S. Navy Expeditionary forces as well as other U.S. Military customers. In addition, the Project Manager will provide support to the JLTV LNO team. Training and mentoring will be provided.

Position Responsibilities:

- Create and develop troubleshooting and diagnostic logic flow diagrams.
- Create and develop formal test procedures for diagnostic software and test equipment.
- Collaborate with diagnostic software developers in the development of diagnostic software applications.
- Assist developers in various testing methods (Validation/Verification) on Military vehicles using test equipment and diagnostic software applications.
- Create New Equipment Training (NET) curriculum for Diagnostic Analyzer Test Set (DATS).
- Travel to U.S. Military bases and or customer sites to conduct Validation/Verification efforts.
- Conduct and perform New Equipment Training (NET) at U.S. Military bases (CONUS/OCONUS).

- Accomplish tasks with minimal supervision and commitment to achieve group goals.
